Objective: ML Engineer with 4 years of experience designing and operating production machine learning infrastructure. Seeking to bring low-latency model serving and feature pipeline expertise to the Nexus AI Platform team.

Work Experience

Lumino AI

ML Engineer **Jan 2022 – Present**

- Led model serving infrastructure supporting 5 production **ML** services at ~2k RPS, reducing p99 inference latency by **40%** through **ONNX** quantisation and dynamic batching.
- Designed real-time feature store (**Redis** + **PostgreSQL**) consumed by 3 model teams, cutting feature computation duplication by ~60%.
- Built **Airflow** DAGs for automated daily retraining of two high-churn models, eliminating ~3h/week of manual retraining overhead.
- Implemented A/B testing and shadow mode rollout framework; caught 2 model regressions before they reached production.

DataStream GmbH

Python Backend Developer **Mar 2020 – Dec 2021**

- Built ETL backbone ingesting 12 third-party data feeds; reduced pipeline failure rate by **35%** via idempotent design and structured alerting.
- Designed webhook ingestion service (**FastAPI** + **Celery**) handling ~5k events/day with deduplication and dead-letter queuing.
- Maintained integration test suite with 80%+ ETL coverage; caught 3 data-loss bugs before they reached production.

Technical Projects

StreamBench **2022**

- Open-source **Python** benchmarking tool for streaming **ML** inference pipelines; measures throughput and p50/p95/p99 latency under configurable load profiles. Used as a pre-deployment gate at Lumino AI.

DataFlow Pipeline **2020**

- **Airflow**-based ETL orchestration framework with idempotent extraction, schema validation, and dead-letter routing; migrated 12 data feeds at DataStream GmbH with zero customer-visible downtime.

Education

M.Sc. Data Science, Fictional State University **2021**

B.Sc. Computer Science, Fictional State University **2019**

Certifications

AWS Certified Machine Learning – Specialty, Amazon Web Services **2023**

Databricks Certified Associate Developer for Apache Spark, Databricks **2022**
